# Product Change Notification

## Reason and Description of the Product Discontinuation

Due to the end-of-life announcement for the autofocus modul integrated in the above mentioned models, we hence disclose the immediate discontinuation of the USB 3 uEye XC cameras.

The official integration and maintenance of USB 3 uEye XC cameras in our software and drivers will be performed for the last time with **IDS Software Suite version 4.92**. We certainly will continue to offer support up to that specific driver version. Please note that however this does not include software maintenance or bug fixes. Earlier software versions are available for download on our website within the [support/software archive section](#).

As usual, IDS will offer product support and repairs for USB 3 uEye XC cameras for two more years after the discontinuation date. **In fact, support ends on September 30<sup>th</sup>, 2020.**

## Recommended Action for Customers

Due to a limited remainder of autofocus modules and therefore cameras on stock, we cannot guarantee that all purchase requests can be fulfilled. Offers will be proceeded only while stocks last on a first-come, first-serve basis.

For questions regarding last-time-orders or replacement models, please contact our sales team.
