Title: Discontinuation of IDS Software Suite supported uEye ACP cameras

Affected Product:	IDS Software Suite supported uEye ACP cameras with GigE or USB3 interface(detailed list of models in document) <ul style="list-style-type: none">• UI-3xxxACP (USB3)• UI-5xxxACP (GigE)
Document Version:	1.0
Release date:	March 08 th 2022

Reasons and Description of the Product Discontinuation

IDS uEye cameras with matchcode 'UI' are combined with the IDS Software Suite SDK. IDS has launched the next generation of digital cameras, the uEye+ camera product line (matchcode 'GV' for cameras with GigE interface and 'U3' for USB3 interface). IDS peak is the associated uEye+ cameras' Software Development Kit (SDK).

IDS offers up-to-date camera hardware and software and is going to focus on uEye+ cameras for further new developments. Therefore all models with matchcode "UI" of the uEye ACP series are discontinued.

Recommended action for customers

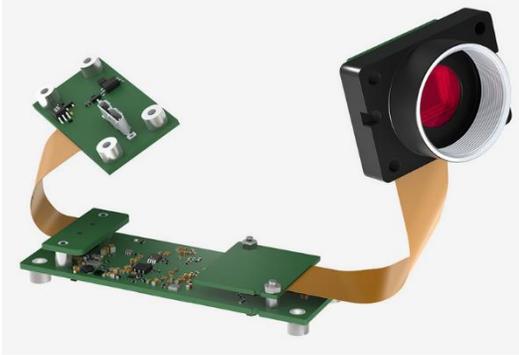

IDS recommends its customers to check demands and place orders until the last time buy date. We are also able to recommend alternative uEye+ replacement models. For any question regarding last time orders or successor models, please contact our sales team.

Important Dates

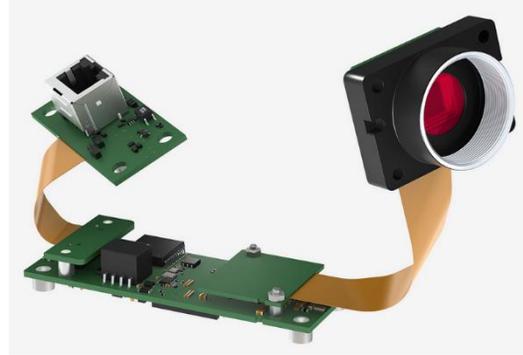

End of Sale	Last Shipment Date	End of Support
30 th September 2022	31 th December 2022	31 th December 2025
