Title: Discontinuation of IDS NXT cameras with old Ethernet Phy

Affected Products:	IDS NXT cameras: <ul style="list-style-type: none"> • IDS NXT rio Rev.1 • IDS NXT rome Rev.1
Document Version:	1.0
Release date:	August 23, 2023

Reasons and description of the product discontinuation

The supplier of the ethernet phy built into the affected cameras, has discontinued the component.

IDS therefore has to announce the discontinuation of the affected cameras below. Due to the forced discontinuation, the respective cameras are no longer available for sale. There is a new camera model with a new ethernet phy from a different supplier. Customers are not affected by the replacement in terms of functionality, cost, optical appearance and technical specification. The only change is the part number.

Recommended action for customers

IDS offers a new camera model revision 1.2, which functions as 1:1 replacement for the old camera models. For any question, please contact our sales team.
